

### "Terry's Mexico."

The Sonora News Company has laid upon the exchange table of THE OASIS a copy of the recently published work of which the caption of this article is the title, which is an accurate and valuable guide book to the neighboring republic, of some 600 pages, with twenty-six maps and plans, and very interesting descriptive and historical text. It is a work which the traveller, tourist or dweller in the republic will find of no little value, as it is replete with interesting and reliable information.

The work has received general commendation at the hands of the press of the interior of the republic, each touching upon its own locality, and commending it on that account. From the same point of view THE OASIS can speak in terms of commendation for the part of the work devoted to Sonora, Sinaloa, and the West Coast generally, with which this journal is most familiar.

The work is published by the Sonora News Company and is on sale at all of its agencies.
